

David Coe

White fur covers the long stretch of skin in my make believe world. Because you see my make believe world isn't a bit like the one you and me live on. It doesn't have mountains or flowers or even people! My make believe world is on the back of a dog and alot can happen on the back of a dog its just a perfect city for fleas! Theres Farmer fleas and Barber fleas and rich fleas and poor fleas and all sorts of fleas, in fact those fleas have about every kind of job people do! Farmers even have cows there called aphids. (afids) The farmers stroke the cows on there backs they seem to like this so they give out a drop of honeydew. ~~drops~~. The Farmer goes around rubbing his cows backs and putting the honeydew in his basket!

them Mrs. flea puts it in jars and sell them at the market.

Theres one funny thing about my make believe world, it doesnt have any mountains! Why doesnt it have any mountains? Probably because they live on a smooth-haired dachshund. If they wanted mountains theyll just have to move to a dog with mountains because im not about to make mountains. I like my my make believe world just like it is!

My fleas (of my make believe world) are usually nice but one thing makes them mad as a mchattered!! There's just 1 little thing 1 little thing that they hate and that's Flooding!! Every single time the dog (that they live on) gets a bath they have to run up his back and hide in his ear. Just recently now (a few months ago) they've started making a dike which will be finished in 72 (probably).
